

AHSAN ALI

IT Infrastructure & Network Engineering Professional

Email: ahsanfn@gmail.com | Phone: +92-333-5224279 | Location: Islamabad, Pakistan

PROFESSIONAL SUMMARY

Experienced IT Infrastructure and Network Engineering professional with 30+ years of expertise in telecommunications, IT infrastructure, and network systems. Skilled in fiber optic networking, data center operations, power systems, and technical project implementation. Strong background in managing complex infrastructure projects, troubleshooting, and delivering reliable solutions across government, utilities, and private sectors.

CORE TECHNICAL COMPETENCIES

- **Network Infrastructure & Fiber Optics:** Fiber optic cabling (indoor, outdoor, aerial), LAN/WAN deployment, E1 patching, RF connector fabrication, network testing, survey & estimation.
- **Data Center & Infrastructure Management:** Data center operations, server room setup, equipment installation, network planning & project coordination.
- **Power Systems & Energy Solutions:** UPS systems, telecom rectifiers, voltage conditioners, single/three-phase power systems & solar energy solutions.
- **Telecommunications Systems:** Fiber splicing, UMUX installation, PABX systems (Panasonic, Huawei, Siemens, Alcatel) & telephone cabling.
- **Security & Access Control:** CCTV installation, biometric systems, smart door locks & access control solutions.
- **Technical Tools & Software:** AutoCAD 2D, Microsoft Office, Visio, Fluke DTX 1800, Windows OS & office/data management.

PROFESSIONAL EXPERIENCE

Team Leader - Infrastructure Projects

Hive-Tech, Islamabad | June 2022 – April 2026 (4 Years)

- Led technical teams for computer lab and infrastructure projects.
- Supervised installation, configuration, and testing of networking systems.
- Ensured project delivery within timelines and quality standards.
- Maintained technical documentation and guided junior staff.

Resident Engineer - Data Center Operations

Fortek Technologies, Islamabad | July 2020 – May 2022 (2 Years)

- Managed critical data center operations for government clients.
- Handled infrastructure upgrades with minimal downtime.
- Maintained UPS, power distribution, and cooling systems.
- Performed troubleshooting and preventive maintenance.

Service Engineer - Telecommunications Infrastructure

Makkays Hi-Tech Systems, Islamabad | 2005 – 2018 (13 Years)

- Installed UMUX systems, E1 patching, and fiber optic infrastructure.
- Executed fiber cabling, splicing, LAN surveys, and cost estimation.
- Implemented CCTV and biometric access control systems.

Assistant Manager - LAN/WAN Infrastructure

Falcon Engineering, Islamabad | 1999 – 2005 (6 Years)

- Managed LAN/WAN deployment and infrastructure projects.
- Supervised fiber optic installation and power cabling systems.
- Performed hardware troubleshooting and team coordination.

Electrician - IT Infrastructure Support

Progressive Electronics & Traders, Islamabad | 1995 – 1998 (3 Years)

- Installed data cabling and electrical infrastructure.
- Performed maintenance, troubleshooting, and telecom cabling support

CERTIFICATIONS & PROFESSIONAL TRAINING

- Network Infrastructure Cabling Deployment (Online Certification Course) - English Language
- Professional Teaching Course (P.T.C.) - Teacher Training Certification
- Field Certification in Fiber Optic Splicing and Network Infrastructure Installation
- Advanced Training in Data Center Operations and Management
- Practical Certification in Telecommunications Infrastructure Systems

SPECIALIZED EXPERTISE

Communication & Telecommunications Division:

- UMUX systems installation, E1 patching, labeling, configuration & troubleshooting
- Fiber optic works including indoor/outdoor installation, splicing (Fujikura) & testing
- LAN surveying, mapping, cable estimation, testing & Fluke DTX 1800 reporting
- RF connectors & telephone cabling (N-type, BNC, RJ series, KRONE, Siemens, Huawei)

- PABX systems installation (Panasonic, Alcatel, Huawei) & configuration
- Technical documentation, reporting & project record management

Power Systems & Energy Solutions Division:

- UPS installation, configuration & maintenance with line voltage conditioners and telecom rectifiers
- Electrical power systems including single/three-phase wiring, distribution design & load management
- Critical infrastructure power solutions including LTS (Line Transfer Switch) installation
- Solar energy systems design & implementation (4KVA inverter-based systems)
- Power panel design, architecture, troubleshooting & system optimization

EDUCATION

- Matric (High School Diploma) - General Education

KEY PROFESSIONAL STRENGTHS

- 30+ years experience in IT infrastructure, networking & telecommunications
- Expertise in enterprise infrastructure design & large-scale deployments
- Strong leadership, project management & troubleshooting skills
- Experienced across government, utility & private sector projects
- Adaptable, with a continuous learning & technology-focused mindset

LANGUAGES

- Urdu - Native Language Proficiency
- English - Working Proficiency
